Student Name: Ranjeet Kumar Sharma

Batch: June

Course: Data Analytics with AI

Assignment: SQL Aggregatioins Assignment

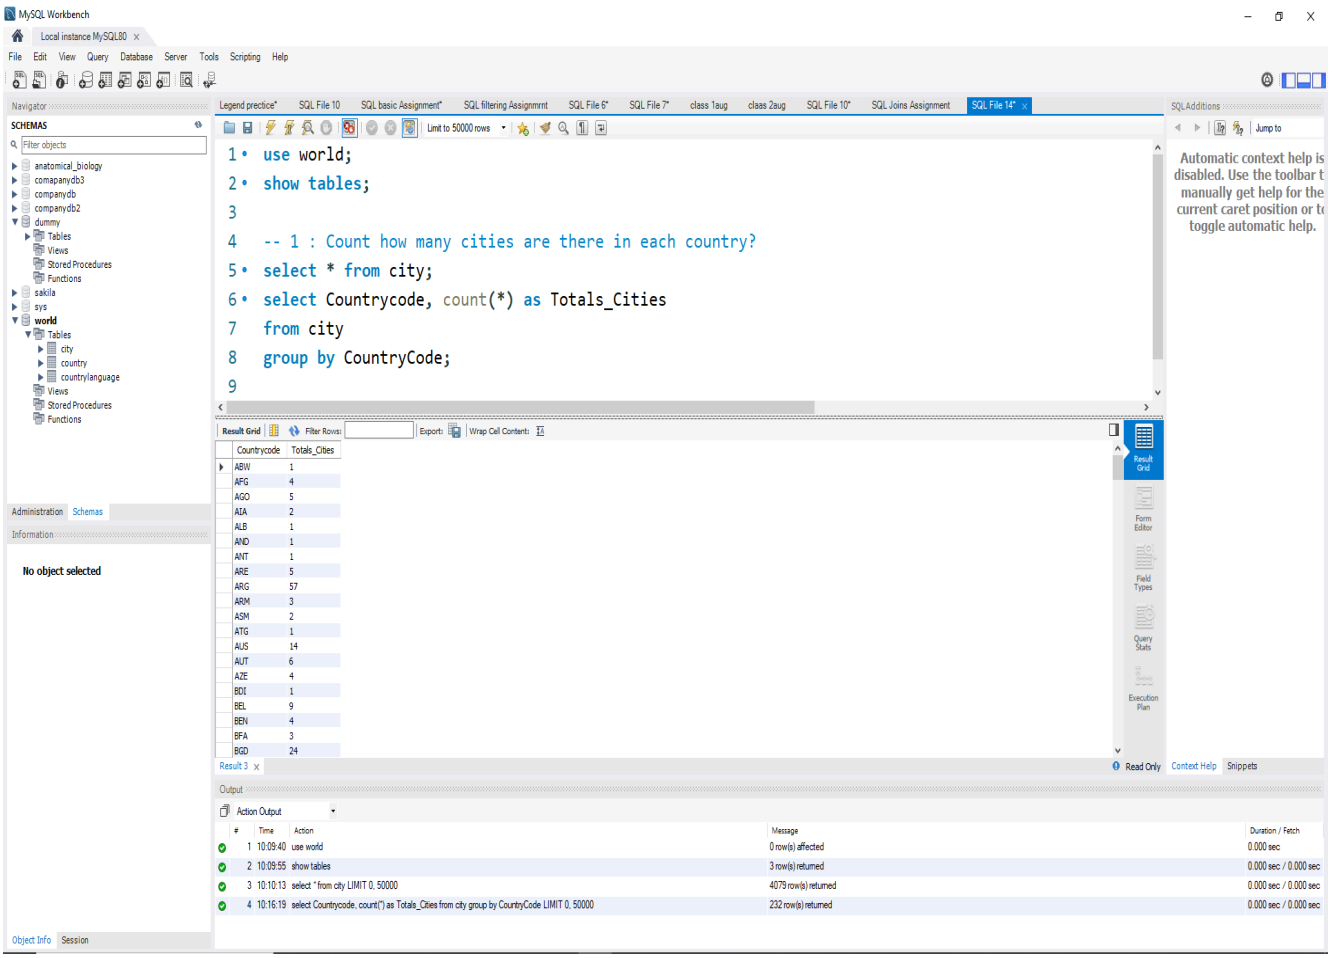

Submission Date:- 05-08-2026

Email_id: Ranjeet Kumar (Sharma)

➔ **Write the Question and Answers.**

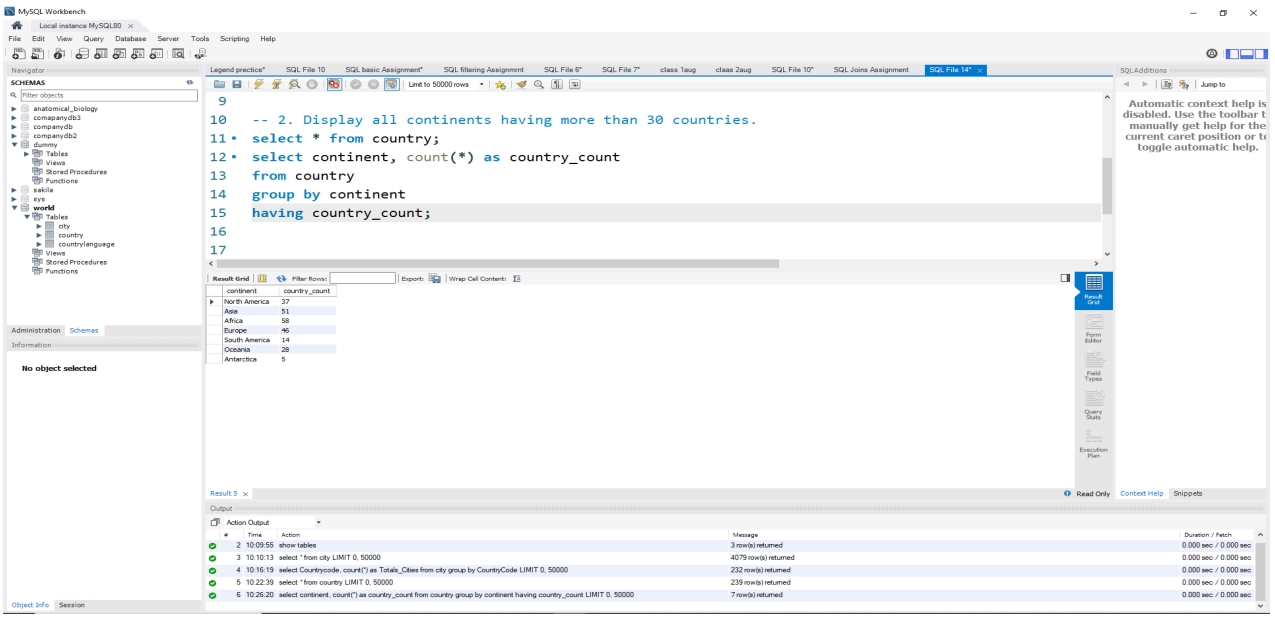

1 : Count how many cities are there in each country?

Ans:- select Countrycode, count(*) as Totals_Cities
from city
group by CountryCode;

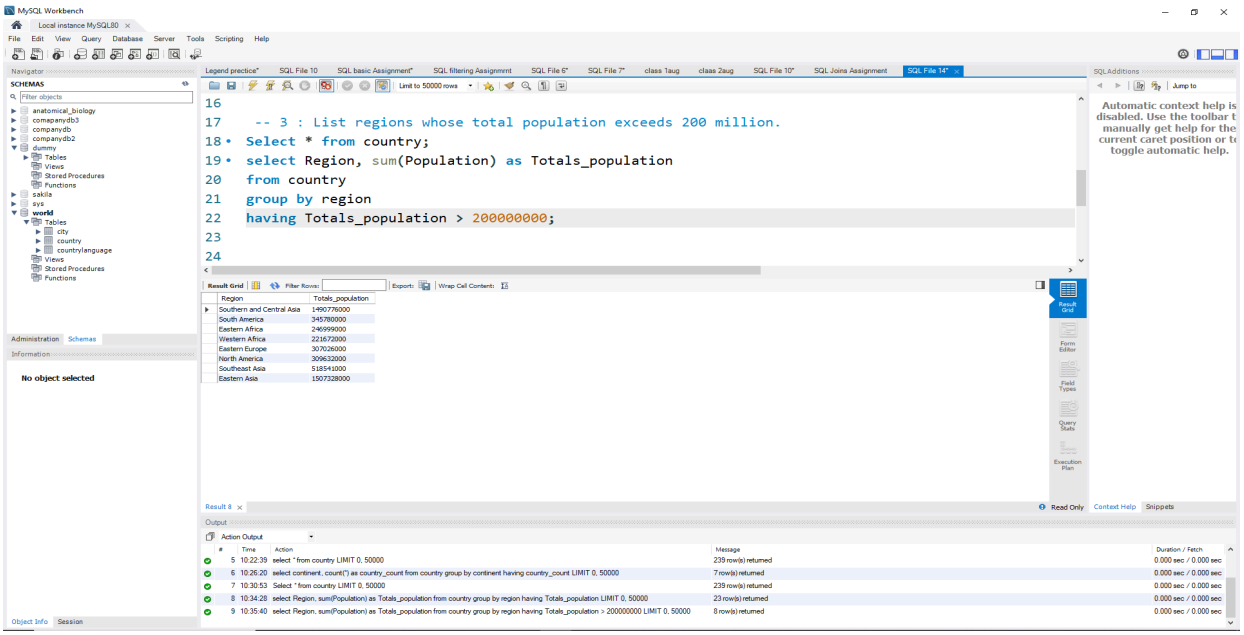

2. Display all continents having more than 30 countries.

Ans:-
```
select * from country;
select continent, count(*) as country_count
from country
group by continent
having country_count;
```

3 : List regions whose total population exceeds 200 million.

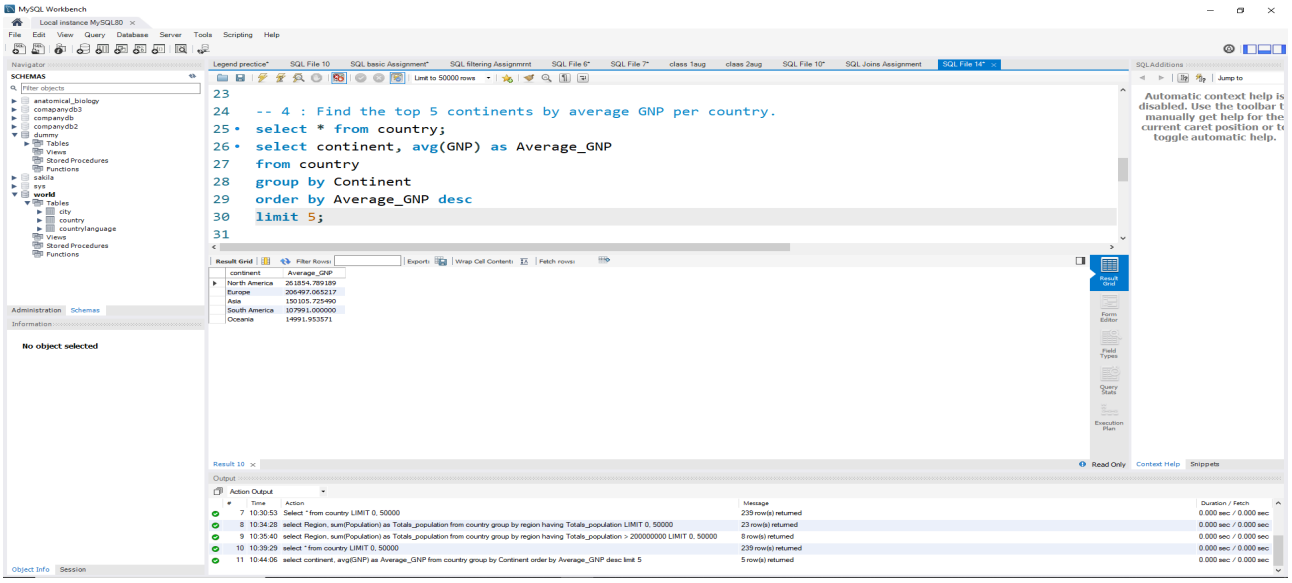

Ans:-
```
Select * from country;
select Region, sum(Population) as Totals_population
from country
group by region
having Totals_population > 200000000;
```

4 : Find the top 5 continents by average GNP per country.

Ans:- select * from country;

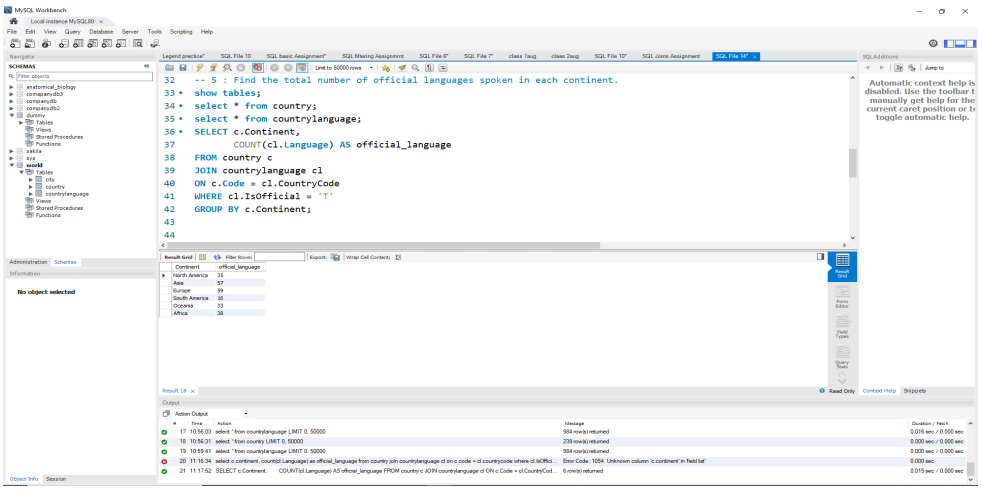

```
select continent, avg(GNP) as Average_GNP
from country
group by Continent
order by Average_GNP desc
limit 5;
```

5 : Find the total number of official languages spoken in each continent.

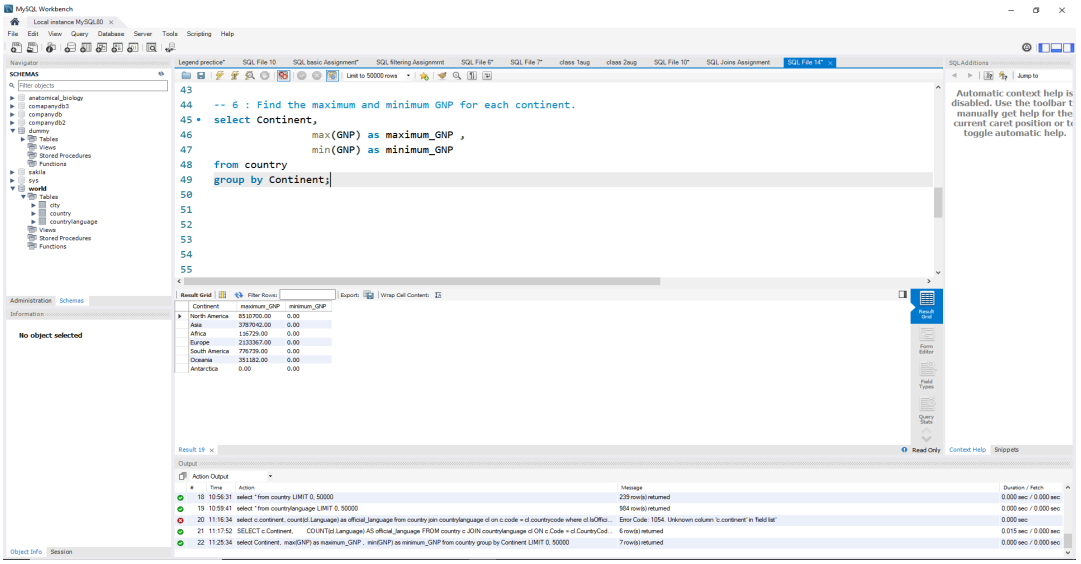

Ans:- show tables;

```
select * from country;
select * from countrylanguage;
SELECT c.Continent,
COUNT(cl.Language) AS official_language
FROM country c
JOIN countrylanguage cl
ON c.Code = cl.CountryCode
WHERE cl.IsOfficial = 'T'
GROUP BY c.Continent;
```

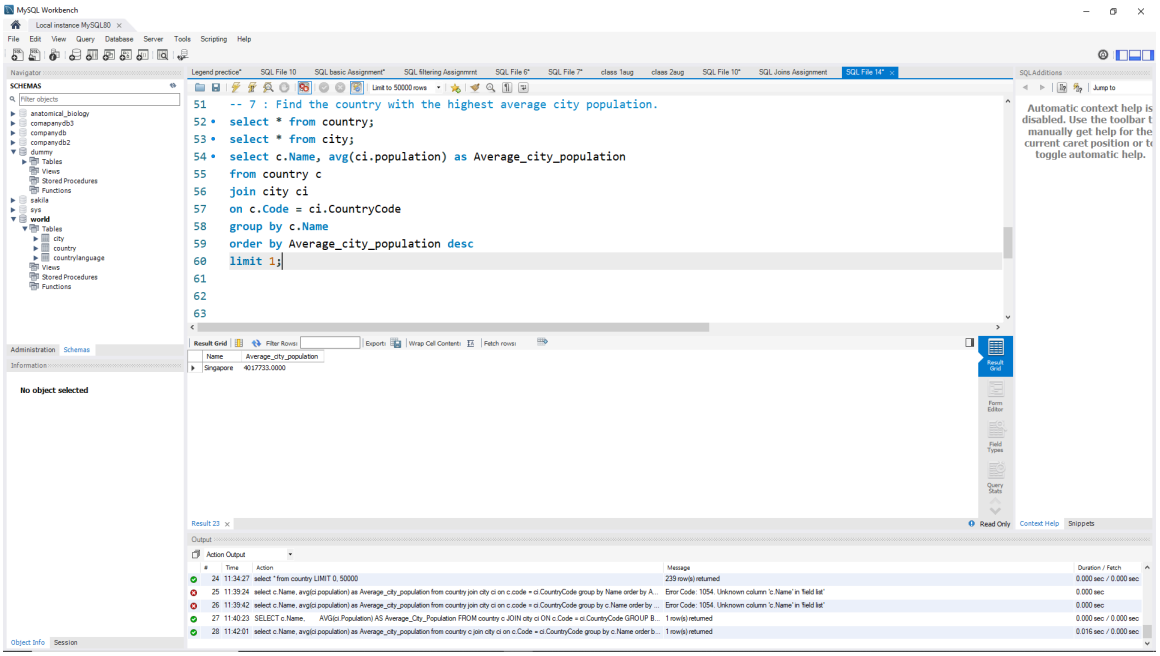

6 : Find the maximum and minimum GNP for each continent.

Ans:- select Continent, max(GNP) as maximum_GNP , min(GNP) as minimum_GNP
from country
group by Continent;

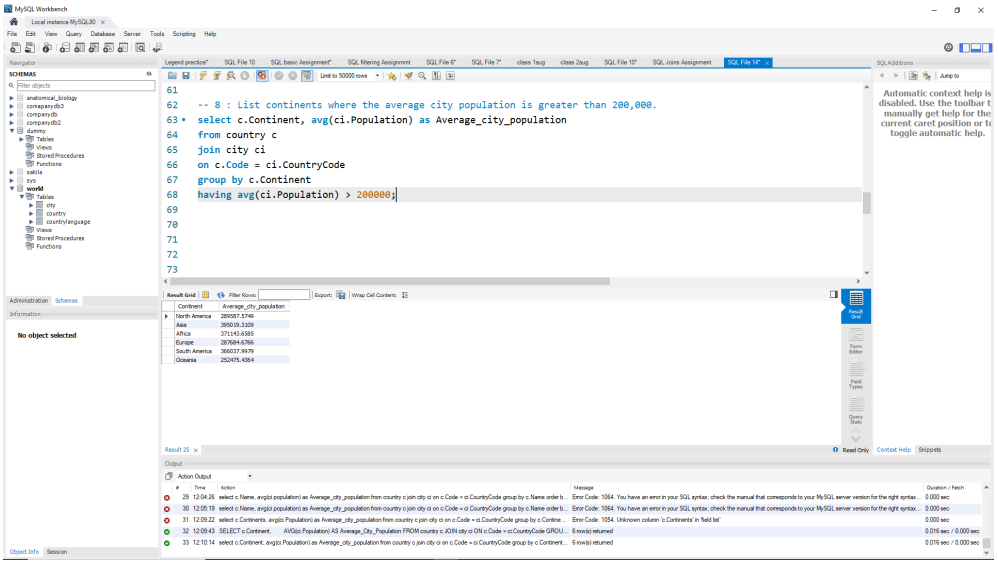

7 : Find the country with the highest average city population.

Ans:- select * from country;
select * from city;
select c.Name, avg(ci.population) as Average_city_population
from country c
join city ci
on c.Code = ci.CountryCode
group by c.Name
order by Average_city_population desc
limit 1;

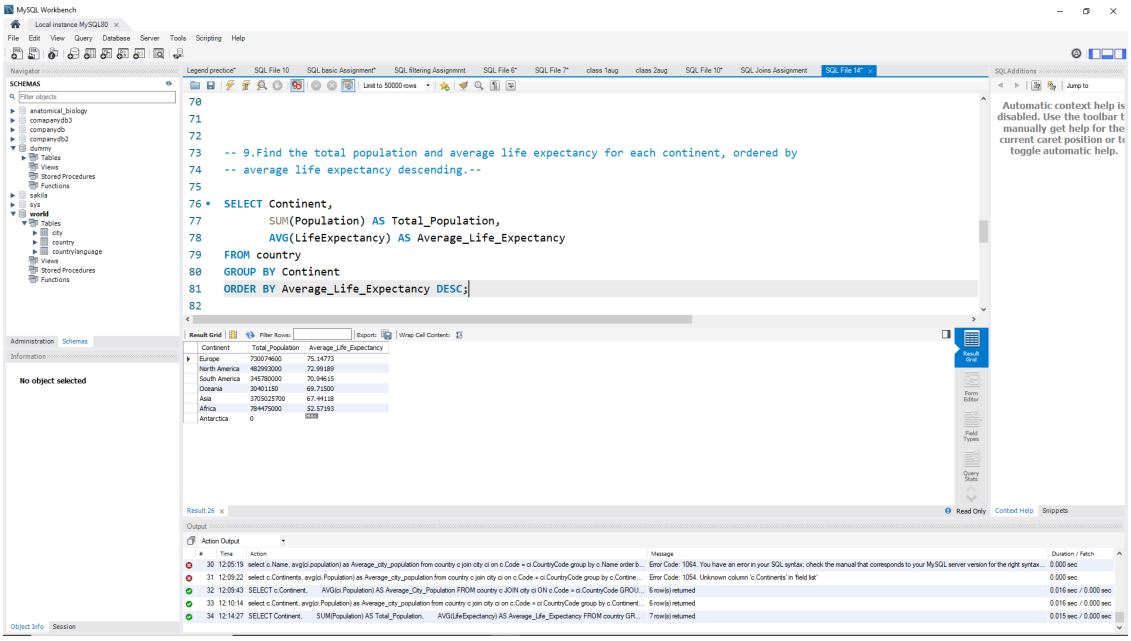

8 : List continents where the average city population is greater than 200,000.

Ans:- select c.Continent, avg(ci.Population) as Average_city_population
from country c
join city ci
on c.Code = ci.CountryCode
group by c.Continent
having avg(ci.Population) > 200000;

9.Find the total population and average life expectancy for each continent, ordered by average life expectancy descending.

Ans:- SELECT Continent, SUM(Population) AS Total_Population,
AVG(LifeExpectancy) AS Average_Life_Expectancy
FROM country
GROUP BY Continent
ORDER BY Average_Life_Expectancy DESC;

10 : Find the top 3 continents with the highest average life expectancy, but only include those where the total population is over 200 million.

Ans:-
```
select Continent,
        avg(LifeExpectancy) as Average_Life_Expectancy,
        sum(Population) as Total_Population
from country
group by Continent
having sum(Population) > 200000000
order by Average_Life_Expectancy desc
limit 3;
```
